Bekasi, Indonesia

Bachelor of Informatics Engineering graduate with experience in IT Network Operation Center and Cloud Engineering. Experienced in infrastructure monitoring, basic network and Linux troubleshooting, and cloud-based technical support. Familiar with Google Cloud Platform, AWS, Docker, and networking fundamentals, with the ability to work quickly, accurately, and collaboratively in resolving technical issues.

EDUCATION

Universitas Bani Saleh, Bekasi 2020-2024
Bachelor of Informatics Engineering (GPA: 3.67/4.00)

WORK EXPERIENCE

- PT. Indostorage Solusi Teknologi, Depok Feb 2026-Present
Devops Engineer

 - Built and managed CI/CD pipelines using GitLab CI for application build, testing, and deployment processes.
 - Supported secure CI/CD, containerization, and application deployment using SonarQube, Harbor, and Trivy
 - Performed troubleshooting on Linux servers, networks, containers, and deployment pipelines.
 - Supported DevOps observability by managing Grafana, VictoriaLogs, VictoriaMetrics, and tracing for infrastructure monitoring, log analysis, metrics, alerting, and incident troubleshooting.
- PT. Data Labs Analytics, Jakarta Jan 2025-Jan 2026
L1 Cloud Engineer Support (GCP)

 - Received, recorded, and classified incoming support tickets via email, phone, or Jira ticketing portal.
 - Responded to infrastructure alerts such as high CPU usage, full disk, or service downtime.
 - Escalated unresolved L1 issues to L2/L3 teams with clear and complete issue documentation.
 - Proactively monitored system health dashboards such as CloudWatch on a 24/7 basis.
 - Ensured ticket resolution aligned with applicable Service Level Agreements (SLA).
 - Diagnosed basic network connectivity issues using ping, traceroute, telnet, and security group/firewall rule checks.
 - Monitored and validated Cloud Armor policies to help protect applications from DDoS and web-based attacks.
 - Verified IAM roles and permissions at project, folder, and organization levels.
 - Analyzed basic system logs to identify common error causes and handled basic Linux/Windows OS issues such as disk cleanup and hung processes.
- PT. Adyatma Cendekia Sinergi Abadi (ACSA), Bekasi Okt 2023-Sept 2024
Staf IT Network operation center

 - Received, analyzed, and provided solutions for Telkomsel card-related issues.
 - Identified, analyzed, and troubleshoot service incidents reported by customers.
 - Monitored Telkomsel servers and applications.
- Kampus Merdeka Ruang Guru, Jakarta Feb 2023-Jun 2023
Frontend Engineering

 - Built responsive web user interfaces using HTML, CSS/SASS, JavaScript, and React/Vue integrated with RESTful APIs.
 - Practiced communication and presentation skills through project-based learning activities.
 - Optimized frontend performance including load time, responsiveness, cross-device compatibility, and UI integration debugging
- Universitas Bani Saleh, Bekasi Mar 2022-Okt 2023
Asisten Lab

 - Assisted lecturers and students in using laboratory applications and software during practical sessions.
 - Prepared, installed, and ensured laboratory applications were ready before classes started.
 - Performed basic technical troubleshooting related to software, networks, and computer systems in the laboratory.
 - Provided brief guidance or training to students on application usage based on course requirements.
 - Performed system maintenance, software updates, activity records, and license documentation.

- Installed, configured, and maintained computers, laptops, printers, and other peripherals to support daily operations.
- Monitored LAN/WAN conditions and internet connectivity, assisted the network team during access or speed issues, and documented incidents.
- Provided technical support for mobile devices, remote access, and internal applications, including user account setup, access rights, and password resets.
- Troubleshoot basic IT issues such as operating system errors, application hangs, viruses/malware, and ensured security updates were performed on time.
- Assisted with IT asset inventory, usage reports, repair records, and IT procurement needs.

PELATIHAN & SERTIFIKAT

Pelatihan			
No	Training Nama	Organisasi	Tahun
1.	Bootcamp Cloud Engineer	Digital Skola	2025
2	AWS reStart Cloud Computing	Orbit Future Academy	2025
3	Kampus merdeka Frontend Engineering (studi independent)	Ruang Guru	2024

SERTIFIKAT				
No	Sertifikat Nama	Organisasi	Tahun	Link
1.	Junior Web Developer	BNSP	2022	Verified
2.	Junior Network Administrasi	BNSP	2023	Verified
3	MikroTik Certified Network Associate (MTCNA) No: 2409NA8322	Mikrotik	2024	Verified

SKILLS & LANGUAGES

Technical Skills:

- Cloud: GCP, AWS
- Container: Docker, Kubernetes, GKE
- CI/CD & Version Control: GitLab CI, GitHub, Git
- Repository: Nexus Repository Server, Harbor
- DevSecOps: SonarQube, Trivy, vulnerability scanning, code quality analysis
- Keamanan: SentinelOne, IAM, firewall/security group
- OS & Web Server: Linux (Ubuntu, RHEL, CentOS), Windows Server Basic, Nginx
- Jaringan: TCP/IP, DNS, ping, traceroute, telnet
- Monitoring & Observability: Grafana, VictoriaMetrics, VictoriaLogs, tracing, alerting
- Productivity Tools: Microsoft 365, Google Workspace, Canva, Zoom

Soft Skills:

Analytical Thinking, Problem Solving, Communication, Teamwork, Adaptability, Self-driven, Time Management

Languages: Indonesian, English
